

Fantasini: Master of Mystery™ Game Rules

- Fantasini: Master of Mystery™ is a 5-reel video slot with 243 Ways to Win. The game features Wild substitutions and a Linked Reel feature on every spin offering even more chances for big wins.
- The game is played with 243 ways to win, 1-10 levels (25 coins per level) and different coin values.
- There are no bet lines.
- The bet level is set using the **LEVEL** selector.
- The coin value is set using the **COIN VALUE** selector.
- **COINS** displays the number of coins the player has available to wager.
- **MAX BET** starts a game round with 243 ways to win, the highest bet level and the current coin value.
- **AUTOPLAY** automatically plays the game for the selected number of rounds.
- Winning combinations and payouts are made according to the **PAYTABLE**.
- A symbol win in coins is equal to the value shown in the **PAYTABLE** multiplied by the bet level and the amount of times that symbol appears on each of the reels.
- The total win in currency is equal to the total win in coins multiplied by the coin value.
- Matching symbols in any position on three or more adjacent reels, starting from leftmost reel to the rightmost reel is a winning combination.
- Only the longest matching combination per symbol is paid.
- More wins are created when additional instances of the same symbol appear on the same reels that create the longest way to win.
- Simultaneous wins for different symbols are added.
- All wins pay on winning symbol combinations only.
- For the total symbol win, multiply the number of matching symbols appearing on one reel by the number of matching symbols on each other reel in the longest winning combination. Multiply the result by the coin win amount for the longest winning symbol combination according to the **PAYTABLE**. The total win for the spin is the sum of symbol wins for each symbol type.

Wild

- Wild symbols can only appear on reels 2, 3, 4 and 5.
- Wild symbols substitute for all symbols.

Linked Reels Feature

- Each spin starts with two identical, adjacent reels that are linked together. During the spin, the linked reels can expand to become triplet, quadruplet or even quintuplet reels.
- At the beginning of each spin, the two identical linked reels can appear adjacently on any of the 5 reels.
- The number of reels that are linked together is random

and occurs independently for each spin.

Example of a Way to Win payout at level 1

- 3 matching crystal ball symbols on adjacent reels starting from the leftmost reel award 15 coins. This is multiplied by 2 (for 2 crystal ball symbols on reel 3), giving a total win of $2 \times 15 = 30$ coins.
